B.Sc. in Software Engineering

*School of Electrical Engineering and Construction "Nikola Tesla" | Zrenjanin, Serbia
Graduated - 2021*

Electrotechnician for Computers

PROJECTS

Journey Buster 3 | JavaScript (NodeJS, MV3), Python (Flask, FastAPI), C# (WPF), MongoDB

A Manifest 3 Chrome Extension geared towards blacklisting specific Twitter profiles found to be using content fabricated by artificial intelligence.

Features a JavaScript front-end complemented with a homebrew back-end API using a combination of NodeJS and Flask/FastAPI managed with a WPF Panel.

Rent-A-Car | C#, WPF, SQLite

Coursework related application for a rental car service. Uses Windows Presentation Foundation for its interface and stores relevant data in an SQLite database.

Asuna | JavaScript (NodeJS), MySQL

Asuna is a multi-purpose automated service that provides extended utilities for chat rooms. I assisted in writing handlers and functions in JavaScript to a new RESTful API, requiring also handling image endpoints, asynchronous events and communication with relational database systems.

SKILLS

Languages: English – Fluent (C2), Serbian (Native)

Proficiency in Object Oriented Languages: C#, Java, C/C++, JavaScript

Proficiency in Frameworks and Libraries: Vue.js, Laravel, Flask, NodeJS, Spring Boot

Proficiency in Relational Databases: MySQL, SQL Server, SQLite

Adobe Creative Suite: Photoshop, Illustrator, Premiere Pro
